Jan-07	Lawrence	West	RapidZoo	6	1,500	634

Data Driven Documents

- <https://d3js.org/>
- D3 is a javascript library to manipulate documents based on data.
 - **not** a charting or data visualization library (it's not like Altair, ggplot2, plotly, matplotlib, seaborn...)
 - [D3 is not a Data Visualization Library - Elijah Meeks](#)
 - no out of the box charts (no functions to automatically build a chart)

Vector (svg) vs. raster (canvas, png, jpg, ...)

- Formulas that describe the lines and points that make up an image
 - Independent from the size of an image
 - Always looks crisp, no matter how much you zoom in or distort the picture
 - Graphics in SVG will be heavier to process
- Describe the color content of each pixel
 - Will appear blurry/pixelated if you zoom in too much

Example code:

https://github.com/NEU-DS-4200-S22/D3_Examples_Base

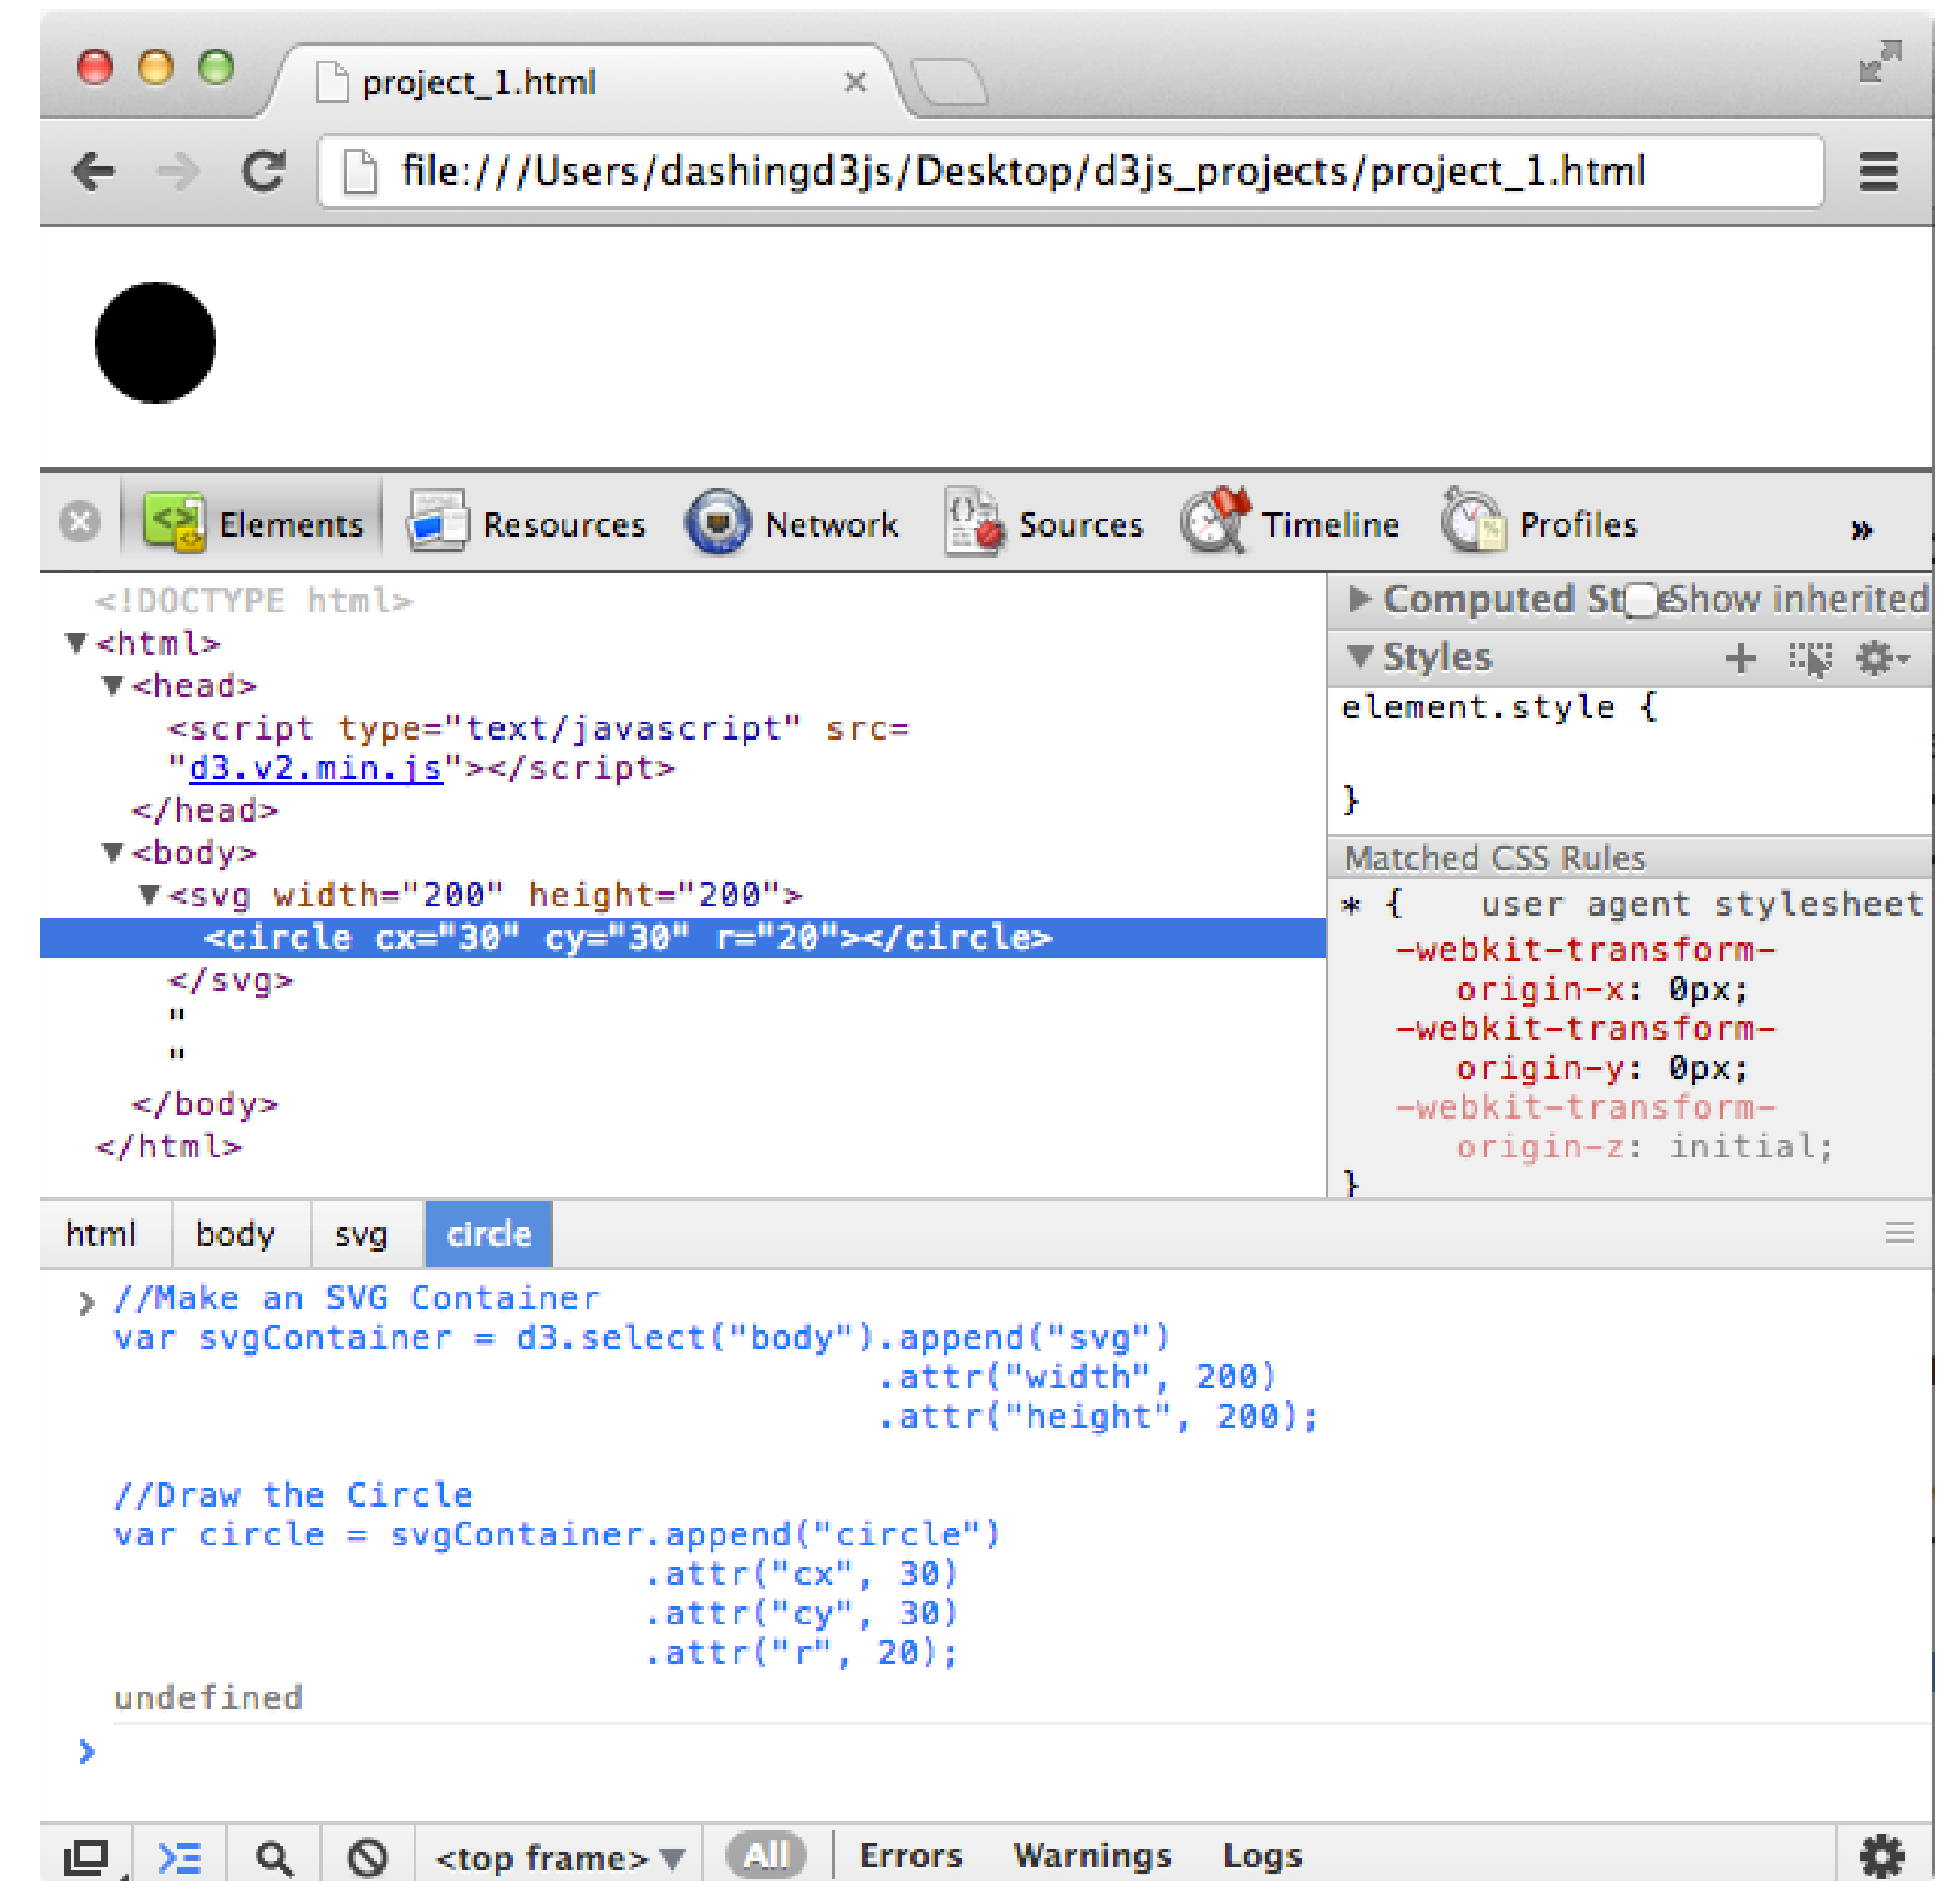

https://github.com/NEU-DS-4200-S22/D3_Examples_Complete

SVG

- `<svg>` tag. E.g., `<svg width='500' height='500'>`
- can add `<style>` attributes
- Basic SVG shapes: `rect`, `circle`, `line`, `text`, `polyline`
- Can group elements using the `<g>` tag

```
svg = d3.select('body').append('svg')
    .attr('width', 200)
    .attr('height', 200)
```

```
var circle = svg.append('circle')
    .attr('cx', 30)
    .attr('cy', 30)
    .attr('r', 20)
    .attr('fill', 'black')
```

Selections

Selections:

```
.select ('selectors')
```

```
.selectAll ('selectors')
```

```
.select('tagname') // select by name of the element
```

```
.select('#id') // select by id of the element
```

```
.select('.classname') // select by class name
```

More info on selections: <https://bost.ocks.org/mike/selection/>

Example: 1-selections-GoT

Data Binding

Data can be added in a number of different ways

Simplest way is through → `.data()`

The `.data()` method joins the current selection with entries in your dataset

Data Binding

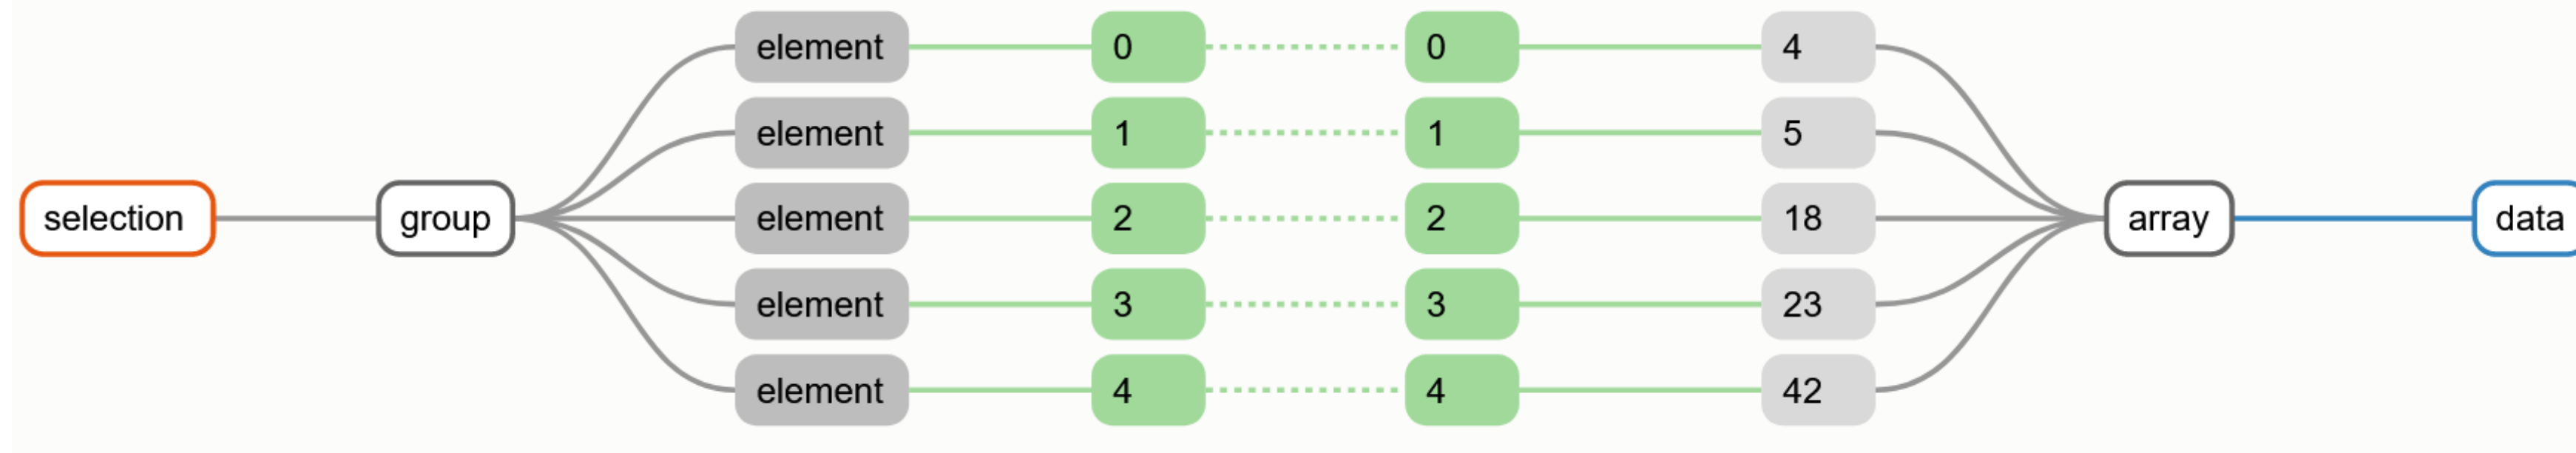

```
var numbers = [4, 5, 18, 23, 42];
```

Data Binding

```
var numbers = [4, 5, 18, 23, 42];
```

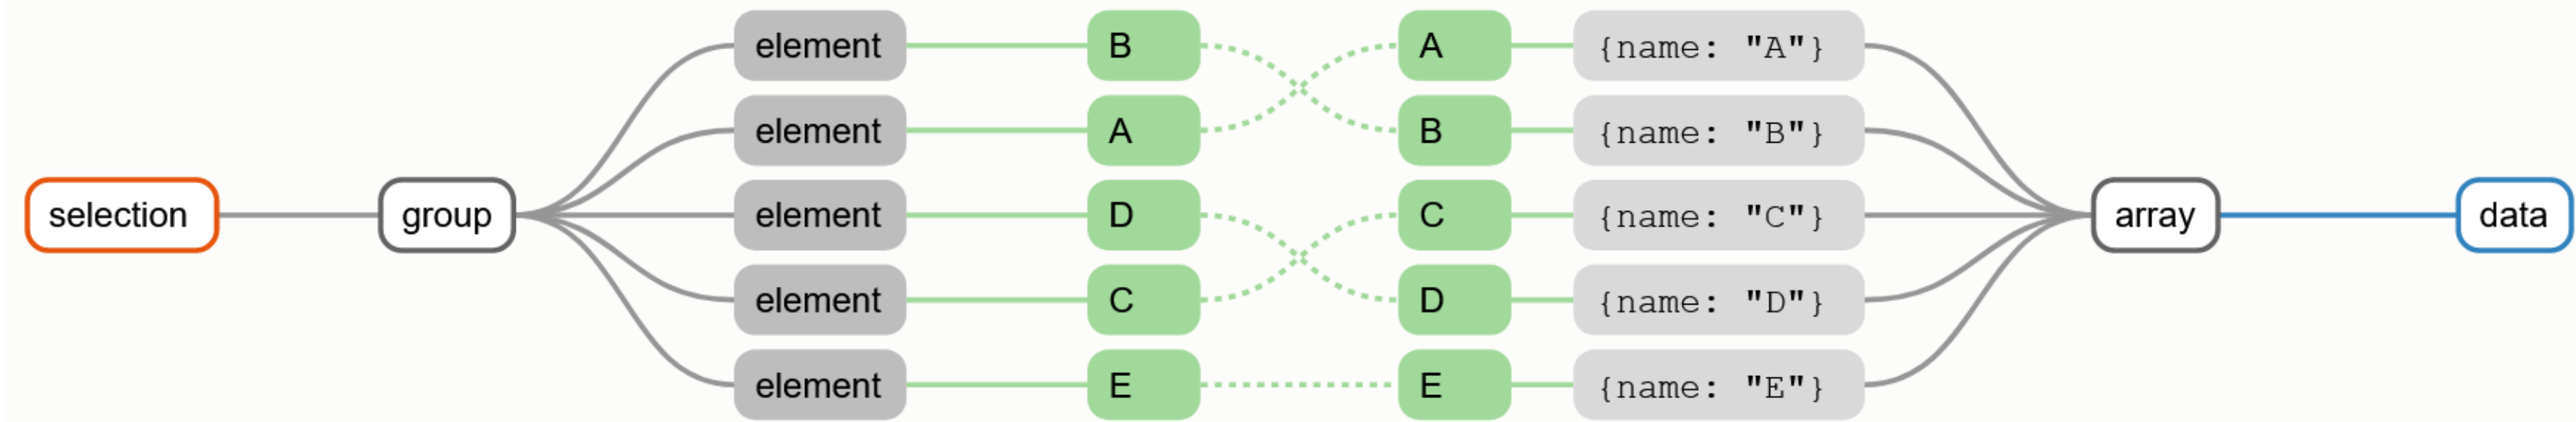

```
d3.selectAll("div").data(numbers);
```

Data Binding

```
var letters = [  
  {name: "A", frequency: .08167},  
  {name: "B", frequency: .01492},  
  {name: "C", frequency: .02780},  
  {name: "D", frequency: .04253},  
  {name: "E", frequency: .12702}  
];  
  
function name(d) {  
  return d.name;  
}
```

Data Binding

```
var letters = [  
  {name: "A", frequency: .08167},  
  {name: "B", frequency: .01492},  
  {name: "C", frequency: .02780},  
  {name: "D", frequency: .04253},  
  {name: "E", frequency: .12702}  
];  
  
function name(d) {  
  return d.name;  
}
```

```
d3.selectAll("div").data(letters, name);
```

The logo consists of two overlapping, stylized 'D' shapes in shades of orange and red, positioned to the left of the text 'Data Binding'.

Data Binding

If you ever get lost:

“How selections work:” <https://bost.ocks.org/mike/selection/>

Modifying Elements

- `text()` // changes the text of the selection
- `html()` // allows you to modify the html
- `append()` // add element to the last child of the selection
- `insert()` // adds element to a more specific position
- `remove()` // deletes element

Controlling Attributes

- `style()` // gives access to any CSS styles
- `classed()` // allows you to toggle classes on and off
- `attr()` // allows you to access any attributes

For Next Time

neu-ds-4200-s22.github.io/schedule

Look at the upcoming assignments and deadlines

- Textbook, Readings, & Reading Quizzes—Variable days
- In-Class Activities—If due, they are due 11:59pm the same day as class

Everyday Required Supplies:

- 5+ colors of pen/pencil
- White paper
- Laptop and charger

Use Canvas Discussions for general questions, email codydunne-and-tas@ccs.neu.edu for questions specific to you.

Week	Topics	Assignments
#1: Jan 17–21	What is visualization Design rules of thumb	A1—Setting up
#2: Jan 24–28	JS development, projects Marks & channels	A2—Encodings & xenographics
#3: Jan 31–Feb 04	Data types and tasks, Tableau D3 tutorial 1/2	P1—Pitches★
#4: Feb 07–11	In-class group formation D3 tutorial 2/2	A3—Tableau analysis P2—Proposal★
#5: Feb 14–18	Altair and JupyterLab Arrange tables	A4—D3 basic charts
#6: Feb 21–25	Color Pop-out, illusions	A5—Altair basic charts P3—Interview & tasks
#7: Feb 28–Mar 04	Interaction & animation (2)	A6—D3 event handling P4—Data, Initial sketches
#8: Mar 07–11	Trees & networks (2)	P5—Final sketches & plan★
<i>Mar 14–18</i>	<i>Spring Break</i>	
#9: Mar 21–25	Project feedback & work Spatial, 3D, and scientific vis.	A7—D3 Brushing & linking 1 P6—Implementation 1
#10: Mar 28–Apr 01	Validation & evaluation Flex day	A8—Brushing & linking 2 P7—Implementation 2
#11: Apr 04–08	Project usability testing, how to give a talk Storytelling	
#12: Apr 11–15	Project presentations 1/2 Project presentations 2/2	P9—Presentations★☒
#13: Apr 18–22	Flex day	P10—Presentation peer review
#14: Apr 25–29	Reflecting & project work	
May 02–06		P11—Video & Final Deliverables★☒
